| <input checked="" type="checkbox"/> Nonprofits or local coalitions | <input type="checkbox"/> Businesses or labor organizations |
| <input checked="" type="checkbox"/> Schools or universities | <input type="checkbox"/> Media |
| <input type="checkbox"/> Health care providers | <input type="checkbox"/> Local public health departments |
| <input type="checkbox"/> State public health departments | <input type="checkbox"/> Policymakers |
| <input type="checkbox"/> Hospitals, clinics or managed care organizations | <input type="checkbox"/> Other: |

Background on the intervention:

Positive Action (PA) is a comprehensive program that uses a detailed curriculum. The stated goals of PA are to improve individuals, families, schools, and communities by teaching that positive actions help develop positive identities.

Findings from the systematic reviews:

The Office of Educational Research and Improvement (OERI) found insufficient evidence to determine effectiveness for this intervention. Practices that lack sufficient research to support effectiveness should not be confused with ineffective programs. Rather, they should be recognized as programs that have the potential to become evidence-based practices—if properly evaluated. Practitioners are encouraged to monitor the impact of these programs in their communities and report on their findings in order to build a base of knowledge sufficient to reach consensus.

Positive Action was cited as a model program by the Substance Abuse and Mental Health Services Administration (SAMHSA). See the link below for additional information.
